Unica Class

Modern life makes us long for nature, with the original, true and pure building blocks of our existence. Like the comforting sight of clear ocean waves, the dust from ochre-colored soil. Or the unexpected chilly hardness from a jagged piece of rock...

Unica Class cover frames brings the roughness of minerals, the beauty of crystal transparency and many other sensations into your life. Open your door and let nature into your home!

Unica Top

A Unica Top choice is what it sounds like. A top choice! Concern about detail is necessary to make a perfect result. Unica Top is made to last, and to make a lasting impression. Don't miss out on the distinction. Find what exclusively matches you!

Unica Plus

Includes that little extra that makes a difference. Satisfying high demands concerning longevity, functionality and cared design. A choice signalling exclusiveness – carrying the impression and comfort of your home to new levels.

Unica Quadro

The trendy choice. Provides your home with a young, fresh, minimalist modern look. In sparkling red or aesthetic silver. Make a statement: Every spot in your home is worth design attention.

Unica Colors

Give each room its own personality. Match your style and interior, as often as you please. A real versatile choice, with several opportunities.

Unica Basic

A choice clearly above the design of the mainstream selection. With a sober, timeless stylish expression, pointing out that you have high standards and care about what your home looks like.

Solutions for comfort, safety and energy-saving

Imagine exploring the resources of Unica in every detail, in order to enhance the refined and elegant atmosphere of your home. Wouldn't a decorator's bliss be to find that with the numerous shapes and colours would also be included the most imaginative functions for cerebral and sensuous comfort? And – at the tip of your finger, getting energy-saving.

P105683

Living-room

Weekly programmable thermostat

Have your home at the right temperature every time. Saves energy – and keeps you comfortable!

Weekly programmable timer

Will save an unexpected amount of energy and prolong the lifetime of your entertainment system.

Loudspeaker socket

Enjoy the access of your sound system at every point.

Weather station

Making decisions easier while chasing kids into the right clothes

Roller-blind (and/or curtain) switch

Lights out for movie time, or good morning sunshine?

Done in a few seconds.

Switch with indicator lamp

Signals that a light is on at the terrace.

Roller blinds

P105656

Bedroom

Save the energy – with enhanced comfort

Prefer a cool bedroom at night?

The thermostat adds power only when necessary.

More Unica Top in the bedroom

Wake-up clock. Light dimmer.

Weather station. Roller-blind control.

Wake-up clock

P105651

Bathroom

Weekly programmable thermostat

To have the home at the right temperature every time, optimizing the energy.

Signal lamp

If this room is occupied – you will know.

Cord push-button

Be smart! A panic alarm command – just in case!

Emergency light

Ever been in a bathroom without windows during a power failure? Don't be!

Weekly programmable thermostat

P105652

P105946

Staircase

P106653

Time delay switch

Time delay switch

For areas where you pass through. Truly energy-saving will make sure the light is only on for a short time, no need to think about switching off. Can easily be combined with a push button.

P124834

Switch with blue locator lamp

Garage

Time delay switch

For areas where you pass through. Will make sure the light is only on for a short time.

Basic thermostat

One of the best places to save energy. A precise control of temperature, without significant drops or increases.

IP44/IP55 covers or surface boxes

For extra safety and protection using electric equipment.

Switch with blue locator lamp

Blue lamp. Always on.

Kitchen

P106654

Rotary dimmer

Weekly programmable thermostat

Let the heart of your home be a warm kitchen. But not too warm!

Weekly programmable timer.

Program the working time of some loads. Saves energy!

Double-pole switch

Double electrical safety. Isolate your devices completely from the installation. Extra important in a kitchen.

High rating switch

Need to run high amp loads at the same time? Without blowing your fuse (or the kitchen fuse).

Alarm-clock

Clock- and alarm function.

Dimmer

Create lighting ambiances, save energy and money.

P106651

Weekly programmable timer

Laundry

Weekly programmable timer.

Program the working time of some loads. Saves energy! And makes sure you are not leaving appliances turned on by mistake.

Basic thermostat

One of the best places to save energy. A precise control of temperature, without significant drops or increases.

IP44/IP55 covers or surface boxes

For extra safety and protection using electrical equipment.

P106656

Roller-blind switch

Home office

Weekly programmable thermostat

To have the home at the right temperature every time is comfortable, and it also optimizes the energy.

Weekly programmable timer

Lights up or starts up (or shuts down) your preferred devices. Will save an unexpected amount of energy and prolong the lifetime of your computer system, printers etc.

Loudspeaker socket

Enjoy the access of your sound system.

Roller-blind (and/or curtain) switch

Lights out or not? Easy peace!

P106657

Emergency light

Storage

P106658

Movement and presence detector

Switch with blue locator lamp

Blue lamp. Always on.

Signal lamps

So that you can tell the status of any connected device, without having to go in there and check.

Movement and presence detector

Automatically activates light (or other functions) when you enter.

Entrance

Key card switch

Welcome home! Easily turns on preferred lights and devices from one single point. Activated by you, unlocking the door. Or deactivated, when you lock and leave.

Weekly programmable thermostat

To have the home at the right temperature every time, optimizing the energy.

Switch with blue locator lamp

Blue lamp. Always on.

Emergency light

Find your way out safely in case of a power failure!

P133207

Comfort

Your home is your considerate friend

Your Unica home helps you keep the right atmosphere at any moment. All day and all night. Any season of the year, your house knows what you need, what you like and how to get you in the right mood. You can direct a suiting ambience for the occasion, and recall it all, at the touch of a button. No sweat. Make the most of your energy – and do it with comfort.

P110587

Thermostat

To get the right temperature at home, to save energy and money. Regulation at finger tips. Clear indication.

P110582

Roller-blind

Roller-blind command in the same cover frame and finish as the rest of the wiring devices. With Unica wireless you can centralize the command and close all shutters at the same time.

P110583

Movement and presence detector

The light when you need it without looking for switches. Good comfort for children, when people wake up at night. Saves energy and money.

P110584

Rotary dimmer

Create light ambiances as you want them. Saves energy, and money.

P110585

Weather station

Weather indication in one sight. Gives humidity, temperature in the room, atmospheric pressure, clock.

P110586

Time delay switch

Stops automatically, you don't need to think about switching off. You can regulate the time you want the switch to be on.

P104878

P104154

Communication

Stay connected

Real-time communication, sharing and distributed on-demand entertainment are a natural part of your life. The demands of effective data transfers push things forward at an incredible speed as the connected community grows.

E-mail, message, on-line gaming, IP phones, music and video mix and redefine the concept of home entertainment and communication. Information is always there when you need it and your good friends are at close reach. Voice, data and living images put you on the spot where it happens, even when you are at home. Your home becomes your hub of life.

TV-SAT socket-outlet
Main standards available.
Different types of gain loss
and installation habits.

RJ45 data socket
Main standards available.
Compatible with main
connectors.
Full range of infraplus and
LexCom data sockets.

RJ12 data socket
Socket for telephone service.

P104155

P104160

Centralization cover frame, 2 x 6 modules, with outlets.
Glossy chrome/aluminium.

P105740

Loudspeaker socket
Choose the best place for your loudspeaker sockets.
Or add a few for extra comfort.

P105647

Wake-up clock
A clock with many functions;
time, temperature, alarm-clock
with up to 9 programmable
alarms. Same design as other
Unica wiring devices.

P105741

Buzzer
Door-bell. Same design as
other Unica wiring devices.

P105742

Electronic door-bell
Choose between 5 different
melodies. Same design as
other Unica wiring devices.

Safety and security

Your reliable guard

Who looks after your home when you're on holiday? Your friends and family? Well, in a former life maybe. Nowadays your home looks after itself, with the use of Unica Top weekly programmable thermostats and timers. Of course electricity in itself is a powerful source. And if it's left uncontrolled it can be dangerous and cause extensive damage. A Unica home helps avoid those problems. Your home is your reliable guard. But take a tip and invite your friends and family to stay in your house anyway. Not to look after it, but to enjoy it.

P110593

Emergency light

To get some light in case of power failure, it has a battery inside. Suitable in stairs for instance or corridors.

P110591

Shuttered socket-outlet

Safety for children. Also available with a hinged flap.

P110592

Key rotary switch

The key is the command for the switch, only the key can allow one of the two positions (on/off). If you remove the key, the access is blocked. Save energy and money, keep the lead on light.

P113236

P113 394

P104153

P105746

Key card switch
Can control access, lights,
equipments.

P105657

Emergency light
Find your way out safely in
case of power failure!

Unica for KNX system

P117504

Greater flexibility and comfort, better energy efficiency with KNX

More and more electronic appliances are needed for modern comfortable homes that contain everything from computers to home cinemas. Does this mean simply increase electricity consumption despite rising energy costs?

A better, faster, cheaper and cleaner solution is to use energy more efficiently. This is not only better for the environment but for your wallet too.

P109932

Intelligent and good looking home

Connect Unica to your KNX system!

P117503

Reading in your favourite armchair in the evening, watching TV on the sofa or dining with family or friends is all the more comfortable if you don't have to get up to switch each light, lamp or thermostat on or off individually.

By setting up individual scenes – for instance using a Unica multi-function push-button – you can combine a wide range of different functions. Once a scene has been created, it can be started at the push of a button – to create a suitable light mood when watching TV or reading for instance or when leaving the house in the morning. If, when doing so, you want the blinds to be raised, the lights switched off and heating turned down, you can activate the «Not at home» scene and all functions will be executed automatically.

P119163

Push-button

- Can be used to control lights or roller blinds.
- The system can be used to control lights and roller blinds according to the sunlight when coupled with a sensor.

P119165

IR push-button

- Can be used to control lights or roller blinds.
- Can be controlled by KNX IR remote control.

P119161

P119164

Automatic lighting control

- Can activate roller blinds or lights
- The system can be used to control lights and roller blinds according to movement detection in corridors, staircases.

P105932

Interested by the intelligent system?
See [KNX catalog](#)

P119162

Individual heating control

- Presence-dependent room heating.
 - Heat is supplied automatically at the exact time required and individually via controllable room temperature control units. No need to turn the radiators up and down manually.
- Don't worry: if you forget to do it, the KNX system will remember to do it for you.

Comprehensive functionalities

Imagine every necessary technical function and appliance that you would wish to be available in your home. The Unica range will most certainly cover every corner of those needs. And be assured, under the attractive surface, every Unica product offers a quality construction. So please, pay a moment of attention to our Unica State Of The Art “Outletology” Chart. Make your choices, and get ready to plug and play.

Installation system

A broad range of mechanisms

A collection covering everything from traditional solutions to the latest electronic technology.

A personalized style

From functional white cover frames with coloured decorative frames for a warmer decor, to our stylish supports for the most demanding interior decoration requirements.

Maximum ease and simplicity

Together with its versatility, wide collection and customization, our range offers ease of installation thanks to our meticulous care over all the details.

1-2-3-4-5 gang

The Unica range has a large number of interfaces to comfortably use the high functionality of the range.

Multigang aesthetic cover frames

Cover frames for flush or surface installations. Horizontal and vertical versions from 1 to 5 gang.

Limit your stock:

In the Unica Quadro, Unica Colors and Unica Basic ranges, the same cover frames can be fitted either vertically or horizontally.

Adaptation to the surrounding space:

The cover frames of Unica Quadro, Unica Colors and Unica Basic can be fitted in whatever way suits the available space best.

Surface CE60 boxes

Surface individual or multiple boxes for vertical or horizontal installations.

Installations in detail

Many years of research and experience have enabled us to produce one of the best fixing frames on the market, combining ruggedness and corrosion resistance with ease of use and fitting. Manufactured in zamak.

P105793
Long fixed claws

Always straight:

Easier to align, with a straight supporting surface that makes it easy to use a level.

No sharp edges:

Manufactured in zamak, the fixing frame is rugged and corrosion resistant. As it is not die-cut, there are no sharp edges.

Easy to fit:

The mounting points and symmetric geometry of the frame assure the possibility to fix horizontally or vertically.

Aesthetics in detail

The final look of an installation does not depend just on the colour and design of the visible parts. It is also essential that all the parts of a light point go together, that they suit the space in which they are fitted and that they are durable. With Unica all this, and more, is possible.

P105795, P105796

P105794

P105796

Perfectly fitted cover frames

The cover frames snap onto the box at four points by means of ratchet-type anchor-pins permitting:

- Precise fixing against irregular walls.
- No hold-ups even though the box stands 0.75 mm out of the wall or is recessed 2.25 mm.

P105797

Designed down to the last detail:

To achieve an aesthetically pleasing design, the curvature of the insert cover frame means that the relief markings on the decorative frame should be parallel to the axis on which the insert pivots.

P105798

Always as good as new:

The gloss finish of the insert and cover frames makes them easy to clean. Just wipe with a cloth and they look as good as new. A cloth is also perfect for cleaning the Unica Top wood and metal frames.

Technical benefits

Switches in detail

Reduce installation time by up to 20%

The overall aim of the new Unica wiring devices is to simplify the installer's job. To achieve this we have worked particularly on all the tiny details of installing our control devices.

Screwless terminals with ergonomics release buttons for 1.5 to 2.5 mm² for rigid and flexible wire.

Safer wiring thanks to the electrical wiring diagram on back engraved by laser (lower risk of incorrect wiring, better visibility at twilight).

Only terminals needed are open.

In both 10 A (grey) and 16 A (black) switches the terminal connection system is by screws.

Installation details, optimal wire stripping lengths and quality marks are clearly marked on the sides of the devices.

No more wiring up indicator lamps: devices with locator/indicator LED lamps do not need an external indicator as it is already built-in.

Low consumption LED lamps:

- no flickering,
- longer lifetime,
- brighter light.

Socket-outlets in detail

Based on our customers' experience as installers, gathered through exhaustive market research, we have developed the fitting and safety features of our socket-outlets to match them to ever stricter productivity and safety requirements.

At the speed of light: Two basic features in the design of the socket make it possible to reduce wiring times substantially. Firstly, the alignment of the terminals makes it possible to cut the wires simultaneously, and secondly sockets are supplied with the terminal screws pre-loosened, eliminating a step in installation.

Childproof: Sockets are fitted with shutters to prevent children inserting foreign bodies in them. These shuttering units are covered with plastic to avoid any damages.

Greater safety: Well dimensioned terminals separated by high walls to avoid short-circuit risk when flexible wires are used.

Available in screwless version with easy color code for cabling.

Centerplate clip in system (no screw): Pre-clipped delivery form for screw version, already clipped for screwless version.

Pilot lamp version: LED is connected as soon as the centerplate is clipped. Possibility to upgrade a simple version to a lamp version with one accessory.

Data sockets in detail

The new Intraplus and LexCom ranges of RJ45 data sockets guarantee optimal connections and high reliability for voice and data transmission, more than meeting the requirements of cat 5e and cat 6.

Ease of connection:

Cables can be connected without tools to the RJ45 socket by hand. Faster cable termination by clipping.

Universal connection:

Complies with all connection conventions: EIA/TIA 568A, 568B.

A wide range:

RJ45 sockets are available for unshielded, foiled and shielded cables meeting the range requirements necessary for cat 5e and cat 6.

Precision technology:

Connectors designed with dual layer compensation to reduce cross talk between wires and improve attenuation characteristics.

U-shaped cable entry with a smart bridle:

Despite being compact in size, the connector has enough room inside for your work. Both space and functions are designed to ease your installation.

P121600

Innovative U-shaped cable entry and spring-loaded earthing bridle.

P121608

Automatic 360° earthing

P121609

Integrated earth-drain contact to provide double earthing

Reliable connections:

Internal contacts: IDC technology to make the connection with the copper wire easier.

Cable organizer:

Easy organization of cables and simultaneous connection of the 4 pairs of cables. Cat 5e: green, cat 6: blue shutter cap colour. Using the organizer ensures the untwisted length is less than the minimum set by the standards (<13 mm.) The organizer is colour-coded for error-free connection.

P121603

Reinforced 360° hood:

CFF – Compact Form Factor improves performance and higher flexibility of connector orientation during installation, and ensures the grounding continuity of the installation.

Protection of the IDC:

The IDC are inserted in a plastic cavity, that's why it's impossible put his fingers on the IDC.

The range is colour-coded:
Both shielded and unshielded connectors are coded according to the same system. Dark blue for Cat6A, Light blue for Cat6 and green for Cat5e.

Label holder to identify port number and services.

P105908

P105910

P105911

Dust-protection shutter

Electronic inserts in detail

New microelectronics-based technological solutions that allow you to install latest-generation electronic functions with the same ease and simplicity as with an electro-mechanical mechanism.

P124781

Error-free connections

All the terminals are clearly marked with symbols to enable error-free wiring. Power terminals and auxiliary terminals are located separately for clarity.

P105769

Design and ergonomics

Maximum attention has been paid to design and ergonomics to ensure they look right in any setting.

P105850

Vanguard technology

Gradual function and totally silent operation thanks to the use of transistor technology.

P105814

P105813

P85881

More features, same depth
Electronic inserts have a larger number of terminals than traditional inserts, so there fore they need more cables. This makes the depth of the device a decisive factor in the ease of installation.

Do less to achieve more

Without adding a single cable, a lighting controller can replace a conventional switch, making them quick and easy to retrofit.

P116402

Slate

Minerals are timeless and eternal. Those qualities bring a very special ambience into a room. Stone enhances the simplicity in all strict and neat surroundings. The individual patterns and shapes of minerals also increase a room's personally flavored distinction.

P116738

Now you can let this fine-grained and metamorphic rock adorn your home with its natural rough elegance and ancient beauty. The slate version of Unica Class deserves to be admired, but it handles actual touching as well, since it has been anti-fingerprint-treated.

P116737

P116412

Metal

It's shining, it's clean. The Unica Class steel and aluminium covers have a solid elegance which enhances spartan interior ideas.

P116604

It's as proper in a working environment, as in the architect's own home. Choose between the brushed Ice or Apple Aluminium, and the Corten Steel with oxidized finishing to get that rusty look.

P113204

Glass

Glass has been used in electric devices from electricity's earliest years. It was also the first modernist architects' preferred material. And now the Unica Class cover frames take the utilization and design of glass one step further.

P116397

P113239

Highlight the crispy ambience in a bright room with Unica Class in radiant white glass, make it exuberant and exciting with black mirror glass, or choose the grey version for a neutral look. All are made of tempered glass for maximum mechanical resistance.

P116391

P116723

Leather

No other material wears the years as well as leather. It's organic, which gives it a completely unique feeling and fragrance. It also has an intriguing shine, which time will increase. And the use of leather in cover frames is as unusual as thrilling!

P116734

The Unica Class frame covers are made of the best quality leather which heightens the level of sophistication in any distinguished setting. Choose between the vibrant chocolate colored Truffle and the creamy beige Sahara.

Sheer design joy

The essentials in our life are the small things; the little extras in the everyday that make a difference. The Unica range offers just that – the essential little extra – a choice clearly above the design of the mainstream selection. Including endless stylish, fresh and innovative solutions. From the more refined, exclusive Unica Plus with temptingly comfortable functionality choices, to the sober and timeless style manifested in Unica Basic. Release your inner aesthetic desire. Rejoice at the available choices; from the sparkingly colourful with accented shapes, young, fresh and modern, to the sober, timeless and luxuriously stylish. Let your home reflect your personality. Personal style prevails!

P105753

Weekly programmable thermostat

To have the home at the right temperature every time optimizing the energy.

P105754

Rotary dimmer

Create lighting ambiances, save energy and money.

P105770

Emergency light

Ever been in a bathroom without windows during a power failure? Don't be!

P105756

Movement and presence detector

Automatically activates light (or others functions) when you enter.

P105760

Roller-blind (and/or curtain) switch

Lights out or not? Easy peace!

P105758

Time delay switch

For areas where you pass through. Truly energy-saving – will make sure the light is only on for a short time, no need to think about switching off. Can easily be combined with a movement detector.

Pressure-fixing of terminals			

The following Unica control devices have to be connected to KNX bus line.

The KNX bus line is laid in parallel to the 230 V power supply.

When Unica sensor is activated (for example, a push-button), an actuator (e.g. the roller shutter control) will carry out all the switching commands required.

2 buttons and 2 blue status LEDs, with screwless bus connecting terminals		4 buttons and 4 blue status LEDs, with screwless bus connecting terminals	
			
Colour	2 modules	2 modules	
■ aluminium	MGU50.530.18	MGU50.531.18	
■ graphite	MGU50.530.25	MGU50.531.25	
● The status LED is located under the symbol window which can be taken off. ● With integrated bus coupler. The bus is connected using a bus connecting terminal. Contents: ● With set of 10 symbols: □ 2x symbol with light opening, □ 1x symbol "1", □ 1x symbol "0", □ 2x symbol for dimming, □ 2x symbol for shutter, □ 2x symbol (neutral). ● With bus connecting terminal.		● The status LED is located under the symbol window which can be taken off. ● With integrated bus coupler. The bus is connected using a bus connecting terminal. Contents: ● With set of 20 symbols: □ 4x symbol with light opening, □ 2x symbol "1", □ 2x symbol "0", □ 4x symbol for dimming, □ 4x symbol for shutter, □ 4x symbol (neutral). ● With bus connecting terminal.	
KNX software functions: Switching, toggling, dimming (single/dual-surface), blind (single/dual-surface), pulse edges trigger 1-, 2-, 4- or 8-bit telegrams (distinction between short and long operation), pulse edges with 2-byte telegrams (distinction between short and long operation), 8-bit linear regulator, scene retrieval, scene saving, disable functions.			
2 buttons, blue status LED and Infra Red (IR) receiver, with screwless bus connecting terminals			
			
Colour	2 modules		
■ aluminium	MGU50.532.18		
■ graphite	MGU50.532.25		
● The status LED is located under the symbol window which can be taken off. The functions of each of the button can be triggered using an IR remote control. The push-button is pre-programmed for operation with a Schneider-Electric IR remote control Distance. Many other IR remote controls (e.g. existing TV or CD player remote controls) can be taught into the push-buttons. ● With integrated bus coupler. The bus is connected using a bus connecting terminal. ● Transmitter: IR remote control Distance, ref. MTN570222. ● Contents: With bus connecting terminal.			
KNX software functions: Switching, toggling, dimming (single/dual-surface), blind (single/dual-surface), pulse edges trigger 1-, 2-, 4- or 8-bit telegrams (distinction between short and long operation), pulse edges with 2-byte telegrams (distinction between short and long operation), 8-bit linear regulator, scene retrieval, scene saving, disable functions.			
Infra Red (IR) remote control for IR push-button receiver			
			
Colour			
■ black	MTN570222		
● 10-channel IR remote control ● Battery: 2 microcells (IEC LR 03, AAA) ● Range: up to 20 m ● Contents: without battery.			

Comfort controls

Movement detector

Colour	2 modules
■ aluminium	MGU50.533.18
■ graphite	MGU50.533.25

When a movement is detected, a data telegram defined by the programming is transmitted.

- Two movement sensors: the sensitivity and range can be set separately for each sensor
- Detection angle: 180°
- Installation height : 1 m to 2.5 m
- Detection area at 2.15 m mounting height : Approx. 9 m on all sides, adjustable in 10 steps (rotary switch or ETS)
- Detection brightness: Infinite setting from approx. 10 lux to approx. 1000 lux (rotary switch) or from 10 lux to 2000 lux (ETS)
- Overshoot time: Adjustable in 6 steps from approx. 1 s to approx. 8 min (rotary switch) or adjustable from 1 s to 255 hours (ETS)
- EC guidelines: Low-voltage guideline 2006/95/EEC and EMC guideline 2004/108/EC
- With bus connecting terminal. The bus is connected using a bus connecting terminal.

KNX software functions: 5 movement blocks: up to 4 functions can be triggered per block.
Telegrams: 1 bit, 1 byte, 2 bytes.

Room temperature control unit

Colour	2 modules
■ aluminium	MGU50.534.18
■ graphite	MGU50.534.25

- With display and 4 buttons
- 2-step control, continuous PI controller, switching PI controller (PWM)
- Output: continuous in the range 0 to 100% or switching ON/OFF
- Controller mode:
 - ☐ Heating with one controller output
 - ☐ Cooling with one controller output
 - ☐ Heating and cooling with separate controller outputs
 - ☐ Heating and cooling with one controller output
 - ☐ 2-step heating with 2 control outputs
 - ☐ 2-step cooling with 2 control outputs
 - ☐ 2-step heating and cooling with 4 control outputs
- Operating modes: Comfort, comfort extension, standby, night reduction, frost/heat protection

Move all setpoints, save all setpoint temperatures and operating modes when reset, external temperature monitoring, additional output of the control value as 1 byte value on the PWM.
With bus connecting terminal. The bus is connected using a bus connecting terminal.

For more information on functions and products in association with KNX, go to Schneider Electric KNX catalogue.
